PROFILE

Full-Stack and Mobile Developer with hands-on experience building web applications, APIs, and mobile products using Python, Django, Next.js, React Native, and TypeScript. Experienced in API integration, database-driven application development, authentication, deployment, and production releases. Built projects spanning AI-powered learning, personal finance, service marketplaces, agency websites, and mobile applications.

TECHNICAL SKILLS

- Python
- JavaScript
- React
- Jetpack Compose
- Tailwind CSS
- Firebase
- Debugging & Troubleshooting
- Django
- TypeScript
- React Native (Expo)
- REST APIs & API Integration
- PostgreSQL
- Git & GitHub
- Django REST Framework
- Next.js
- Kotlin
- HTML5 & CSS3
- SQLite
- Deployment & Production Releases

WORK EXPERIENCE

Lead Developer - MarketBrainers

2024-2026

- Handled development work across the marketing agency's projects, taking responsibility for implementation and delivery.
- Built the MarketBrainers website using Django.
- Built the Vaultor and Crownie websites.
- Worked with APIs and integrations as part of application development.
- Handled deployment and production releases.

Lead Developer - MachoMeats Enterprise

Contract | 2026

- Built and developed the company's website using Next.js as a contract development engagement.

Android Development Intern - CoLab Innovation Hub, Kaduna

Summer 2024

- Trained in Android application development using Kotlin.
- Worked with Jetpack Compose for Android user interfaces.
- Worked with Firebase as part of Android application development.

Full-Stack Development Intern - New Horizons, Ikeja, Lagos

Summer 2023

- Trained in full-stack web development using PHP and Laravel.
- Developed web interfaces using HTML, CSS, and Bootstrap.
- Gained practical experience working with the Laravel framework and frontend development.

SELECTED PROJECTS

Quanta Learning - AI-Powered Learning Platform

Next.js, React, Python, Django, Django REST Framework, PostgreSQL, OpenRouter, JWT

- Building an AI-powered learning platform designed around persistent learning context rather than isolated AI conversations.
- Implemented the Knowledge Engine end-to-end alongside AI Tutor, Memory Constellation, Learning Replay, Practice, Progress, and authentication systems.
- Developed LLM provider abstraction and context-aware learning workflows within a full-stack application architecture.

SpendWise - Personal Finance Mobile Application

React Native, Expo, TypeScript, React, Python, Django, Django REST Framework, SQLite, Zustand

- Built a full-stack personal finance mobile application with a Django REST backend and React Native/Expo client.
- Implemented expense management, budgeting, recurring expenses, financial analytics, reporting, shared expense groups, JWT authentication, and secure token storage.
- Structured the backend into domain-specific Django applications and integrated the mobile client with the REST API.

Sync - Everyday Services Marketplace

React Native, Expo, Django, Django REST Framework, PostgreSQL

- Developing a two-sided on-demand services marketplace connecting customers with local service providers.
- Connected the mobile client to backend workflows covering provider onboarding, service areas, address management, bookings, provider job management, and job progression.
- Designed around customer and provider roles with marketplace, payment, and service-completion workflows.

EDUCATION

Veritas University - 2026

Bachelor of Science (B.Sc.), Computer Studies

CERTIFICATIONS & TRAINING

- Cisco DevNet Associate - Certified
- College Board AP Career Kickstart Cybersecurity - Completed, certificate pending

LANGUAGES

English | Hausa (Conversational)
